MidWest Chemical & Equipment Certified as a Woman Business Enterprise

MidWest Chemical & Equipment has been certified as a business owned and controlled by a woman by the National Women Business Owners Corporation (NWBOC). The goal of NWBOC certification is to streamline the certification process and increase the ability of women business owners to compete for contracts at a national level.

Midwest Chemical & Equipment, located at 809 Prosper Road in De Pere, is owned by Mary Giese, who is also president of the company. She started the company with her husband, Matt Giese, five years ago.

MidWest Chemical & Equipment provides measurable process improvements and cost reductions by solving wastewater treatment issues for companies of all sizes. The company provides chemistries that include polymers, odor control agents, acids, bases and other process chemistries. In addition to the chemistries, MidWest supplies a broad range of equipment, including chemical metering pumps, pH controllers, and other chemical-feed related equipment.

For further information, contact Mary Giese at MidWest Chemical & Equipment, Inc. at 920-339-9783 or visit the website at www.midwestce.com
